

NEW: Charging Stations in the FILADELFIE and DELTA Buildings

During the month of August, **two public electric car charging stations were installed** in the parking garages of the **FILADELFIE Building (parking spaces 106 and 107) and the DELTA Building (parking spaces 012 and 013)** as part of the Elektromobilita ČEZ project.

This step came after the introduction of the electric shuttle bus as part of our plan to help improve the environment. In upcoming months, the plan is to install a rapid charging station on Za Brumlovka St. in cooperation with ČEZ and ABB.

The charging stations in the FILADELFIE and DELTA Buildings are outfitted with two separate Mennekes outlets (32 A/400 V). The charging stations use electricity from renewable sources and are suitable for charging all types of electric cars available on the market.
